It's a Face-off Between You and the Devil!

Devil's Crush—The Ultimate Game of Pinball Action!

"Devil's Crush" is an incredible video pinball game combining "turbo-charged" action with eerie, underworld graphics. You play in a world cursed with devils. Channel your rage into the Spring of Justice. Attack the monsters' base of operations. Break their evil magic spells and bring light back to this cursed world. You control the ball speed, flippers, even "trill" the board, just as you would in a real pinball game. But beware. Because no ordinary pinball game could ever prepare you to meet the devil. Will you win? Or will you be "crushed" like the others?

Object of the Game

Defeat the devil and his evil followers on all levels of this living pinball machine. Compete with your friends for the highest score. Blast the ball past bizarre creatures and into bonus rounds where even greater adventures await you. The game is over when no more balls are left.

Please Note: Devil's Crush can be played by one or two players. For two players, a TurboGrafx-16 IntroTap accessory and an additional TurboPad controller are recommended (but not required). These items should be available at the retail location where your TurboGrafx-16 Entertainment SuperSystem was purchased.

Inserting the TurboChip Game Card

1. Remove the TurboChip game card from its plastic case.
2. Hold the TurboChip game card with the info side up and gently slide it into the Game Card Port until you feel a firm click (do not bend the game card or touch its metal parts as this could erase the program).
3. Slide the Control Deck Power Switch to the ON position (if your game card is not inserted properly, the Power Switch will not move all the way to the right).
4. The title screen of your particular TurboChip game card should appear on your television.

Starting the Game

From the Title Screen, press the RUN Button and the following options will appear one at a time:

Play Mode Select

Using the Direction Key, select either "1 PLAYER" or "2 PLAYERS" and press Button I or the RUN Button to enter your choice.

Speed Select

Using the Direction Key, select either "FAST" or "SLOW" and press Button I or the RUN Button to enter your choice.

Select

Using the Direction Key, choose either "NEW GAME," "PASSWORD" or "DATA LOAD" and press Button I or the RUN Button to enter your choice.

Devil's Crush will now begin.

Operating Controls

In Devil's Crush, just as in real pinball, you must use two flippers to keep the ball in play. The basic game controls are Button I and the Direction Key—these operate the flippers. Button I is also used to activate the plunger (shooter) mechanism.

Button II allows you to "tilt" the board and affect the roll of the ball. When you press this button, you'll be able to judge the playing field, just like a real pinball machine.

TurboPad Operation

- A Direction Key** (4-way controller)
Operates left flipper
- B SELECT Button**
Used to select options. Also calls up the "High Scores" screen
- C RUN Button**
Starts and pauses the game
- D Button II**
Allows you to "tilt" the board
- E Button I**
Controls the right flipper and shooter. Also allows you to "save" your game if you are using a backup system or to obtain a password if you do not have a backup system
- F Turbo Switches**
Should be in the "OFF" position.

Game Functions and Features

Pausing the Game

During play, the game may be paused by pressing the RUN Button.

Resetting the Game

During play, the game can be reset to the title screen by holding down the RUN Button and pressing the SELECT Button at the same time.

"Saving" Your Game

You can save your game at any point—even if you do not have backup memory!

If you have a TurboGrafx-CD system or a TurboBooster-Plus accessory, please see page 8 of this manual. If you do not have either of these items, you can save your game by using a password.

To obtain a password for "Devil's Crush," simply press the RUN Button to pause the game, and then press the SELECT Button. The "High Scores" screen should appear. Press Button I to make your password appear. Write down the password that is displayed so that you do not forget it.

To return to the game, first press Button II to bring you back to the "High Scores" screen. Then press the SELECT Button to make the game screen reappear. As your last step, press the RUN Button to "un-pause" the game.

Last Chance!

After you lose your last ball, you can play a number matching game that awards you an extra ball if you win! If the number on the screen matches the last three digits of your score, you will win one extra ball!

Recording Your Name and Score

After the game is over, and if you scored more than 1,000,000 points, you can record your name or initials on the high score board.

When the "High Scores" screen appears, select up to three characters by using the Direction Key and pressing Button I. If you make a mistake, press Button II to cancel. Your score will automatically be entered next to your name.

To view the "High Scores" screen during play, press the SELECT Button. To return to the game, press the SELECT Button to make the game screen reappear and then the RUN Button to "un-pause" the game.

Screen Displays and Scoring

Scoring

Each time the ball touches a monster or passes through a particular obstacle, you score points as indicated in the charts on pages 6 and 7 of this booklet.

You can also score bonus points when any of the following three bonus point indicators appear on the screen:

- BP** (Standard Bonus Points)
- BT** (Extra Bonus Points—"Bonus Tip")
- BM** (Extra, *Extra* Bonus Points—"Bonus Megnrld")

Watch out for Bonus Balls!

If you clear the bonus stage with a perfect score, the ball will change to blue. While the ball is blue, any points you score will automatically be quadrupled!

Nota for TurboGrafx-CD and TurboBooster-Plus Owners and Playing Tips

Your TurboGrafx-CD system or TurboBooster-Plus loads back up memory in Devil's Crush, this means that you can stop playing anywhere in the game and start again from the same place—even if your system has been turned off!

Note: you must "Ruchurge" your system by saving it on at least once every two weeks—or your data will be lost!

How to Save "Data"

Your TurboGrafx-CD system or TurboBooster-Plus will save the "data" from your game save and the number of balls remain (up) if you follow these four simple steps:

1. Press the RUN Button to pause the game.
2. Press the SELECT Button to make the "High Scores" screen appear.
3. Press Button I to make the Password screen appear.
4. Press Button I to save the file.

Note: You can store up to 5 files in backup memory at any one time.

If you decide that you do not want to save the file and you have not completed Step 4, press Button II to abort the saving process.

If you would like to resume gameplay, press the SELECT Button to make the screen appear and then press the RUN Button to "resume" the game.

What to do if your Memory Unit is at Full Capacity
If your Memory Unit is full, the following message will appear on the screen when you attempt to save additional "data":

NOT ENOUGH MEMORY. KILL OTHER GAME DATA?

YES
NO

IF YOU SELECT "YES," ALL OF YOUR FILES WILL BE DESTROYED! So be sure that you want to get rid of **EVERYTHING** before you select "YES!"

If you are playing the game using the TurboGrafx-CD system follow the instructions in the CD manual until you see the CD System Card.

If you are playing the game using the TurboBooster-Plus, **BEWARE!** If you use the Super Editor from Devil's Crush, it will eliminate **ALL** of the files held in memory! To get around this, try saving your place in Devil's Crush by obtaining a password (see page 3 of this manual) and using a Screen Editor from another TurboGrafx game, such as "Chew-Man-Fu" or "Nemesis."

Initialization of the Backup Unit

Your Backup Unit is "initialized" (made operational) the minute the system is turned on. However, please note that if the battery runs out, or if the unit becomes defective, it may lose data that you wanted to keep.

To Avoid Losing "Data"

Game information may be lost if the Backup Memory Unit is dropped or exposed to heavy shock. Do not touch the cassette (expansion bin) between the TurboGrafx-16 and the TurboGrafx-CD or TurboBooster Plus.

Remember, turn your system on at least once every two weeks!

Playing Tip

Winning Extra Balls and accumulating Bonus Points are essential to achieving high scores!

Save your game often!

Just like its predecessor, Devil's Crush, Devil's Crush can be beaten with a score of 999,999,999. When this happens, the Devils will be destroyed!

Call the TurboGrafx Hotline at (708) 860-3648 for additional game playing tips!
